OBJECTIVE

To become a professional Frontend Developer specializing in ReactJS and Next.js, focused on building responsive, high-performance, and user-centric web applications.
I aim to continuously strengthen my frontend architecture skills while effectively collaborating with backend systems through RESTful APIs, authentication mechanisms, and modern development workflows. My long-term goal is to contribute to scalable, high-quality products and grow into a frontend expert who delivers real business value.

EDUCATION

(August 2022 - December 2025)

CAN THO UNIVERSITY │ **Software Engineering**
GPA: 3.58 / 4.0

WORK EXPERIENCE

09/ 2025 - Present

TekNix Technology Corporation │ **Frontend Intern**
- Developed and maintained responsive websites for approximately **60 international dental clinics and dentists** using **ReactJS**, **Next.js**, and **WordPress**.
- Built user-friendly interfaces to showcase clinic services, dental teams, and online appointment booking features.
- Improved user experience by optimizing responsive layouts, page performance, and navigation flows across devices.
- Integrated frontend applications with **RESTful APIs** and collaborated with backend systems for data handling and authentication.
- Contributed to internal projects using **Framer**, creating interactive UI components and rapid prototypes to support faster development cycles.

Technologies: ReactJS, Next.js, WordPress, Tailwind, REST API, Framer, SEO.

06 / 2025 - 08 / 2025

Green Space Solution JSC │ **Fullstack Intern**
- Designed and optimized the frontend interface for the **Transportation Management System (AutoTMS)**, focusing on performance and scalability.
- Implemented UI features for key modules including **Group Management, Vehicle Management, and Vehicle Maintenance Workflow**.
- Integrated frontend components with backend services built on **NestJS, Strapi, Prisma ORM** and **GraphQL**, ensuring accurate and consistent data rendering.
- Collaborated in code reviews to improve code quality, maintainability, and team development standards.

Technologies: Next.js, Hero UI, REST API, NestJS, Strapi, Prisma ORM, GraphQL

06 / 2024 - 04 / 2025   **UTA Co., Ltd.** │ **IT Intern**

- Developed and optimized frontend interfaces for internal web applications using **ReactJS** and modern UI practices.
- Built the frontend for an **AI-based pest diagnosis system (PagoSolution)**, integrating model results into the user interface.
- Improved UI performance and responsiveness, reducing load time and enhancing user interaction.
- Designed and implemented responsive UI for the **IECES project**, ensuring cross-device compatibility.
- Collaborated with backend services built with **NestJS** to consume APIs and handle application data.

Technologies: ReactJS, NestJS, REST API, PhoBERT, Tailwind CSS, WordPress

SKILLS

- **Frontend:** ReactJS, Next.js, WordPress, Redux Toolkit, Jotai, Context API,Tailwind CSS, MUI, HeroUI, Ant Design, Shadcn/UI, Responsive Design, UI/UX Best Practices.

- **Programming Languages:** JavaScript, TypeScript, PHP.

- **Tool AI:** Chat GPT, Gemini Pro, V0, Lovable, PEO, Google AI Studio

- **Backend:** RESTful APIs, NestJS, JWT Authentication, OAuth 2.0, PostgreSQL, TypeORM.

- **Tools & Workflow:** Git, GitHub Postman, DBeaver VS Code, IntelliJ IDEA Framer, Vercel, Google Colab.
- **Soft Skills:** Problem-solving, Team collaboration, Time management.

PROJECTS

04/2025 - 08/2025   **E-commerce Farm Platform (Bachelor's Thesis)** │ **FullStack Developer**

- Developed responsive and user-friendly web interfaces using **Next.js, ReactJS, Tailwind CSS, and Shadcn/UI**.
- Implemented state management with **Redux Toolkit** to handle product listings, orders, and user interactions efficiently.
- Integrated frontend with **REST APIs**, handling authentication, authorization, and data flow between frontend and backend systems.
- Collaborated with backend services built using **NestJS** and **PostgreSQL** to ensure consistent data rendering and system reliability.
- Focused on clean frontend architecture and performance optimization for scalable e-commerce features.
- Developed a cross-platform mobile application using **Flutter**, reusing API logic and applying **Clean Architecture** principles to ensure maintainability and scalability.

Technologies: NestJS, JWT, TypeORM, OAuth 2.0 Google, PostgreSQL, Next.js, TypeScript, Tailwind CSS, Shadcn/UI, React-Redux, Reduxjs/toolkit, Flutter.

04/2024 - 08/2024   **Homestay Booking Web Application (Group Project – 2 members)** │ **Frontend Developer**

- Built frontend features for a homestay booking platform using **ReactJS**, focusing on search, filtering, and booking workflows.
- Implemented responsive UI components with **Tailwind CSS and MUI** to ensure a consistent user experience across devices.
- Integrated real-time features such as **chat** and booking status updates.

- Worked closely with backend APIs to fetch and display homestay data, user information, and booking details.
- Improved overall usability by optimizing UI structure and interaction flows.
